

JAGADESH JAYARAJ

Chennai | jagadeshjayaraj11@gmail.com | 9841735345 | <https://github.com/jagadeshjayarajgit>

Professional Summary

Software developer with 2 years of experience building enterprise web applications that support a large hospital network spanning patient records, inventory management, and role-based approval systems. Proficient in Java, Spring Boot, Angular, and microservices architecture, with a track record of delivering measurable impact, including a 50% improvement in report retrieval for 500+ healthcare professionals.Experienced in building enterprise healthcare software across patient management, clinical workflows, and multi-role hospital operations.

Professional experience

Software Developer, Dr. Agarwal's Health Care Limited– Chennai	Apr 2024 - Present
- Contributed to migrating 3 legacy systems (Patient Reports, Penta, YPP Billings) from .NET/PHP monoliths to a Spring Boot microservices backend and Angular frontend over 18 months, eliminating system crashes on large report loads by converting synchronous APIs to asynchronous architecture. - Deployed a patient-facing web app for on-demand access to visit reports and medical records across all Dr. Agarwal's hospital branches, reducing dependency on front-desk staff for report retrieval. - Built a Hospital Management System digitizing workflows for 10+ hospital roles, replacing entirely paper-based processes for approvals, refunds, IP bookings, insurance pre-auth, and inventory tracking. - Currently developing a single-page EMR system for the entire Dr. Agarwal's network, consolidating fragmented workflows into a unified past/present view to reduce consultation documentation time. - Engineered a PWA for patient report management, cutting report retrieval time by 50% for 500+ healthcare professionals.	

Software Developer Intern, bridgelabz	Jan 2024 - Apr 2024
Completed an intensive Java backend training program, building foundational skills in Spring Boot, microservices architecture, OOP principles, SOLID design, and SQL data modeling through structured assignments and hands-on exercises.	

Skills

Programming Languages: Java, JavaScript, HTML, CSS, TypeScript, SQL
Frameworks: Spring Boot, Spring, Angular.
Tools & Technologies: Spring MVC, Hibernate, Git, JUnit, REST APIs, Maven
Core Concepts: Object-Oriented Programming, SOLID Principles, Microservice Architecture, Database Design
AI tools : Claude Code , Codex ,Cursor.

Education

2020 - 2024

SRM Institute of Science and Technology– Chennai, India
Bachelor of Technology (B.Tech), Computer Science and Engineering- CGPA: 8.5/10.0

Projects

Retrospective Chat App | Java, Spring Boot, SQL, WebSockets, Angular,TypeScript
Developed a real-time retrospective discussion tool using Spring Boot and WebSockets, enabling seamless collaboration among distributed teams.Implemented multi-room support using Socket.IO and WebSockets for parallel project discussions, and secured chat rooms with Spring Security and JWT-based authentication with role-based access control.Built the frontend using Angular and TypeScript, implementing lazy loading, Redux and asynchronous WebSocket handling to enhance UI responsiveness and optimize resource usage.

Secure Smart Home Data Using Blockchain Technology With HashAlgorithm
I built this project as part of my college curriculum to enhance data security in smart homes. By integrating blockchain and cryptographic hash algorithms, I ensured tamper-proof logging of device activities. The system securely records and verifies data from IoT devices, making it reliable.

Certificates

AWS Certified Cloud Practitioner
